

JESSICA LADISLAU

Front-End & Design Engineer — Web, AI-Assisted Design & Growth

Phone: +1 509 289-9978 | Email: paula.jfe@gmail.com

LinkedIn: linkedin.com/in/jessica-ladislaui | Github Portfolio: paula-jfe.github.io

SUMMARY

Frontend Software Engineer with 5+ years of experience building scalable applications and modern web interfaces using React and TypeScript. Currently working as a Design Engineer, combining UI/UX design, accessibility, and modern web development to drive user engagement and performance. Backed by a strong analytical foundation, including a Master's degree with research in Machine Learning, and daily hands-on experience leveraging AI tools for rapid execution, design, and content scaling.

SKILLS

- **Front-End Development:** JavaScript (ES6+), React, Redux, Context API, TypeScript, Micro Frontends (Module Federation), Semantic HTML, CSS, TailwindCSS, REST APIs
- **Design & AI-Assisted Content:** Figma, Midjourney, Canva, Stitch, Claude, brand identity, ad creative, social media content
- **Testing & Quality:** Jest, React Testing Library (RTL), TDD, Accessibility (A11y / WCAG)
- **Data & Backend (working knowledge):** Python, SQL, Node.js, GraphQL, C# ASP.NET Core, Elasticsearch, Docker
- **Process & Collaboration:** Agile/Scrum, Git, CI/CD, DevOps, cross-functional & global team collaboration

PROFESSIONAL EXPERIENCE

Design EngineerApr/2025 – Current

Webeluga, Oregon, US (Freelancer) — Remote

- Partner directly with a US-based client as their embedded design & web engineer, owning the relationship end-to-end from strategy to shipped product.
- Built the client's marketing website from scratch in React and TypeScript — fully hand-coded, no no-code tools — now live in production.
- Preparing to lead development of the client's LMS (Learning Management System) platform, the team's next major build.
- Design and produce ad creative, brand identity, and visual assets using AI tools (Midjourney, Canva, Stitch, Claude); launched the client's social media content presence this year.
- Translate client goals directly into UI design, front-end development, and marketing strategy, prioritizing usability, accessibility, and SEO.

Key Technologies and Tools: React, TypeScript, HTML, CSS, Tailwind CSS, Figma, Midjourney, Canva, Stitch, Claude

Software EngineerSep/2021 – Apr/2025

Dell Technologies, São Paulo, BR — Remote

- Scaled frontend platforms by building micro-frontends (MFE) with React, Redux, and Module Federation (Webpack 5), enabling independent deployments across 4 product teams and improving accessibility (WCAG compliance).
- Created a reusable application boilerplate adopted by roughly 8 front-end developers across those 4 teams and recorded training videos to support rollout — work recognized with a formal company award.
- Increased code stability with TDD (Jest, RTL), reaching 96% test coverage and reducing rework; mentored an intern on testing and frontend best practices.
- Collaborated with UX and PMs as a manual QA tester to optimize user flows, delivering UI improvements that reduced friction and improved overall usability.
- Developed Python ETL pipelines and GraphQL queries to integrate TigerGraph data into Elasticsearch, powering dynamic filters and fuzzy match search.
- Maintained ASP.NET Core REST APIs, customized CI/CD pipelines (GitLab), and drove Agile (Scrum) collaboration across global, multicultural teams; deployed and maintained applications on PCF for cloud-native scalability.

Key Technologies and Tools: JavaScript, TypeScript, React, MFE, Redux, Material UI, HTML, CSS, Jest, RTL, Webpack 5, Single-SPA, ASP.NET Core, Python, GraphQL, Elasticsearch, Git, CI/CD

Full Stack DeveloperMay/2021 – Sep/2021

Payface, Florianópolis, BR — Remote

- Developed responsive user interfaces using React, TypeScript, HTML, CSS, and Material UI (MUI), with a strong focus on user experience.
- Ensured code quality through consistent unit testing with Jest and React Testing Library, contributing to a more stable and maintainable codebase.
- Maintained and refactored code to improve performance, readability, and modularity, supporting ongoing feature development with minimal technical debt.
- Actively participated in Agile ceremonies (sprint planning, refinement, retrospectives); used Git and Bitbucket for version control and code review.
- Integrated Node.js REST API endpoints API-first, ensuring seamless data flow between frontend components and backend microservices.

Key Technologies and Tools: React, TypeScript, JavaScript, Redux, HTML, CSS, Material UI (MUI), Jest, RTL, Git, Bitbucket, Node.js

Web Developer — Summer JobJan/2021 – Apr/2021

Trybe, Belo Horizonte, BR — Remote

- Reviewed and validated educational content for early modules of a software development course and built frontend micro-projects to help students practice through hands-on exercises.
- Provided structured feedback on student projects covering HTML, CSS, JavaScript (ES6), React, Redux, Context API, and unit testing (Jest, RTL).
- Collaborated in sprint-based review cycles using Slack and GitHub, contributing to a cohesive, supportive learning environment.
- Integrated Node.js and Express APIs as part of student projects to demonstrate CRUD operations and core technical concepts.

Key Technologies and Tools: React, Redux, Context API, JavaScript, HTML, CSS, Jest, RTL, Node.js, Express, NPM, Git, GitHub

EDUCATION

Master's Degree in Technological Innovation — Universidade Federal de São Paulo, São Paulo, BR (Jan/2020 – Dec/2022)

Thesis: PCA Statistical Method for Classification of Sensors — applied Machine Learning research using Python, Scikit-learn, Pandas, and Anaconda to reduce dimensionality of sensor data and extract meaningful features.

Bachelor's Degree in Electrical and Electronic Engineering — Universidade Paulista, São Paulo, BR (Jan/2011 – Dec/2015)

Thesis: Analysis of Residential Electricity Consumption — built a web-based monitoring interface displaying real-time household energy data collected via Arduino.

CERTIFICATES / COURSES

- Elasticsearch (Moving forward with Elasticsearch), School of Net, BR — Feb/2023
- Full-stack Web Development (1500 hours), Trybe, BR — Sep/2021
- Web Application Security, Udemy, BR — Aug/2021
- SCRUM Fundamentals for Agile Project Management, Grupo Voitto, BR — May/2020
